paid_search	32.94	€ 185.36	5.6	8.0	4	-€ 31.96
affiliate	32.03	€ 251.54	7.9	11.5	3	-€ 490.95
referral	12.47	€ 165.36	13.3	22.7	2	€ 54.49

Recommended: half the spend in three channels, 20% more in referral.

Every paid channel pays back within 6 months, before credit losses

Paid social loses most after KYC: only 52% of its verified customers fund.

Segment Name

Channel Name

All

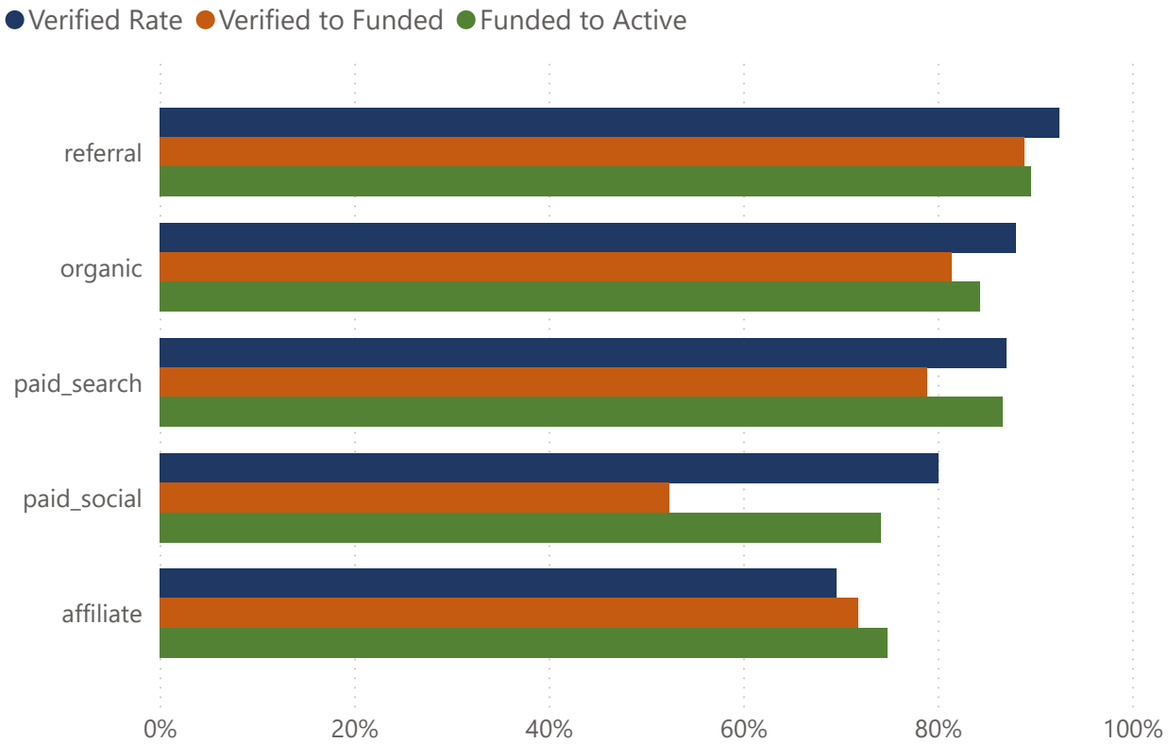

Where customers drop out, in numbers.

Channel	Signups	Verified	Funded in Funnel	Active
affiliate	1,711	1,190	846	582
organic	1,980	1,742	1,401	1,101
paid_search	2,276	1,981	1,545	1,256
paid_social	2,917	2,336	1,225	851
referral	1,116	1,032	911	761

Students and freelancers fund least often after verifying.

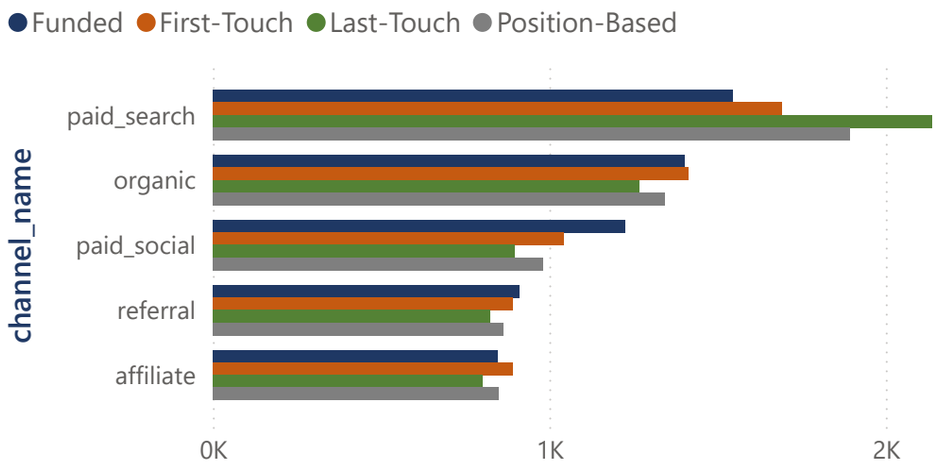

Segment	Verified Rate	Verified to Funded	Funded to Active	Signups
freelancer	79.2%	67.2%	79.7%	1,498
salaried	86.4%	80.4%	86.0%	2,933
student	78.2%	63.0%	75.6%	2,167
unknown	81.7%	71.8%	81.8%	378
young_professional	84.6%	72.5%	83.2%	3,024
Total	**82.8%**	**72.2%**	**82.3%**	**10,000**

Paid social has the weakest step: verified to funded.

The recorded channel gives paid social about 20% too much credit, and paid search about 22% too little.

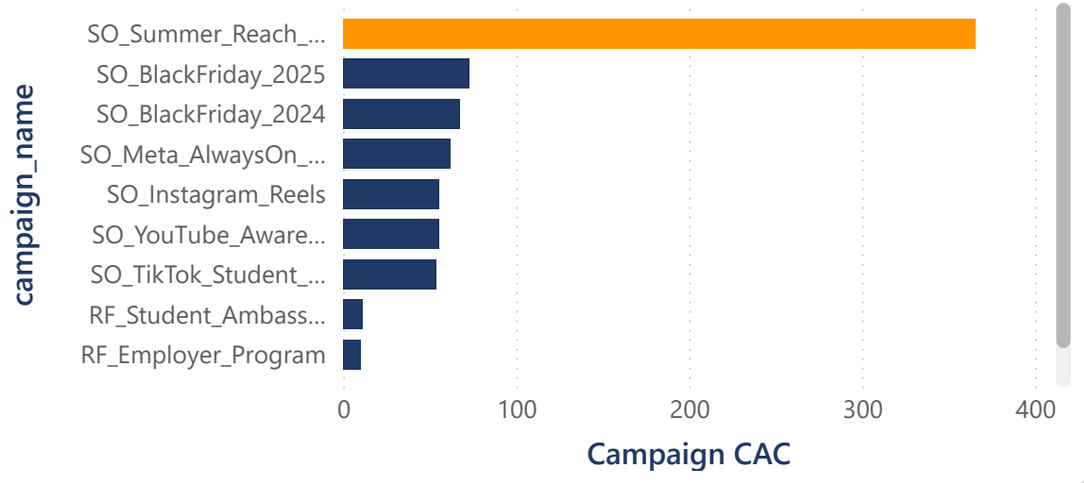

Customers credited to each channel, by model.

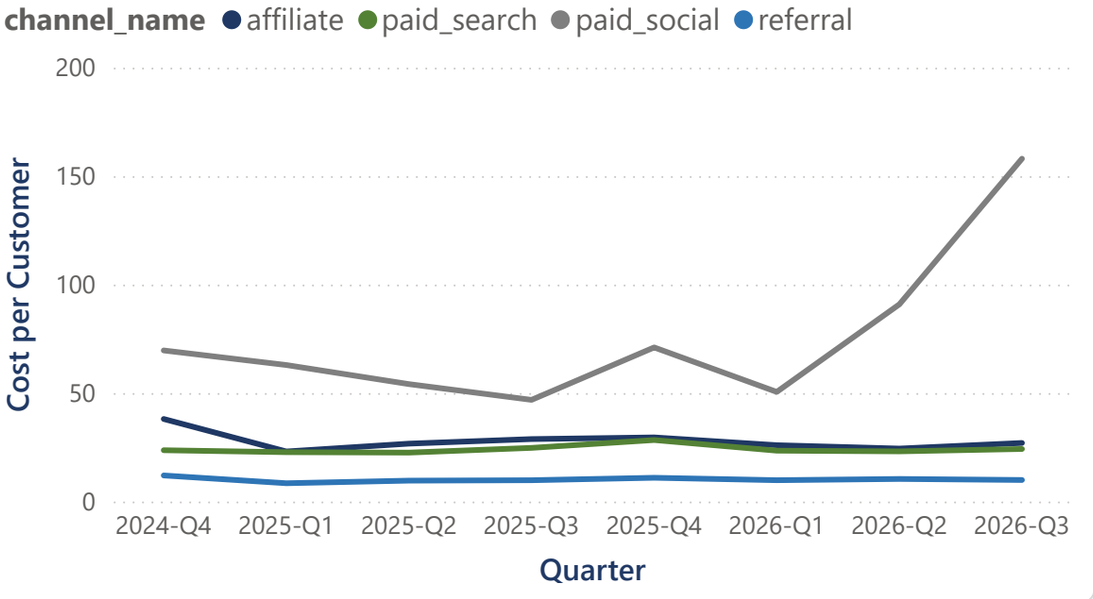

Paid social costs 66 per customer as recorded, 82 with position-based credit.

channel_name	CAC	Attributed CAC	Credit Shift %
affiliate	32.03	31.92	0.4%
organic			-4.2%
paid_search	32.94	26.90	22.5%
paid_social	65.59	81.87	-19.9%
referral	12.47	13.17	-5.3%

Top 10 campaigns by cost per customer: SO_Summer_Reach_2026 costs 365.

Paid social cost per customer jumps to 158 in 2026-Q3.

Affiliate has the best value before credit losses and the worst after them.

Only referral keeps a positive value after credit losses.

Early defaults concentrate in affiliate students (37%). Grey = fewer than 50 loans.

segment	affiliate	organic	paid_search	paid_social	referral	**Total**
freelancer	8.0%	9.4%	9.8%	12.2%	12.5%	**10.5%**

Reallocating improves the quarter in all 8 scenarios.

Scenario	Total spend (EUR)	Customers won	Net profit	Uplift (EUR)
Base case	15,058	470	-56,843.21	40,720.43
Budget +20%	15,058	470	-56,843.21	40,720.43
Budget -20%	15,058	470	-56,843.21	40,720.43
Budget fully spent (equality rule)	28,107	572	-75,920.68	21,642.96
Credit losses +25%	14,792	460	-88,647.74	56,722.25
Credit losses -25%	15,058	470	-25,020.92	24,736.38
Interest after month 12 counted	15,058	470	-32,595.19	30,107.03
Paid social curve fitted on all 24 months	15,058	448	-55,514.30	37,317.73

Budget plus or minus 20% gives the same result, because the model never wants to spend more where customers lose money. The last row forces the whole budget to be spent, which moves money into paid social.

Quarterly uplift by scenario (EUR).
